

2026 COLLECTION

performance starts in your head

Rudy Project believes that true performance begins not on the track, field, or road, but inside an athlete's head. This profound understanding that the mind—where determination, strategy, and vision for success are born—is the cornerstone of our mission. We dedicate ourselves to advancing technologies and designs that not only safeguard the athlete but also enhance focus, perception, and performance.

Our approach combines rigorous scientific research with a commitment to sustainability. Through continuous innovation, using the latest discoveries in materials and aerodynamics, Rudy Project develops sports gear that prioritizes safety, comfort, and performance. Our commitment to environmental and social responsibility ensures our products respect and protect the community and the planet.

ride to zero

At the heart of Rudy Project lies our advanced sports equipment, meticulously designed to optimize athletic performance while adhering to our sustainability ethos. Our products are not just tools for competition; they are instruments that enhance athletic endeavor across various sports, from cycling to running and beyond. The 'Ride to Zero' initiative represents our dedication to reducing our environmental impact. This program aims to significantly lower carbon emissions through sustainable practices in production, the use of eco-friendly materials, and promoting circular economy principles, thereby preserving our global playground for future generations.

Performance

Performance 40

**Experience the legend.
Own the legacy.
Rudy Project Performance 40,
Celebrating 40 Years of
Visionary Innovation.**

Celebrating four decades of visionary innovation, Rudy Project proudly presents Performance 40, an extraordinary tribute to our pioneering spirit and iconic heritage. Inspired by the original 1985 "Performance" model—the very first frame that marked Rudy Project's bold entry into the world of sports eyewear—Performance 40 perfectly blends historical charm with cutting-edge technology.

Crafted in a highly limited series, each Performance 40 is precision 3D-printed from pure titanium, delivering unparalleled durability and featherweight comfort. By harnessing modern additive manufacturing, we've engineered a revolutionary lattice structure into the temples and frame—something previously unattainable with traditional injection molding. This intricate, lattice design not only showcases our technical prowess but also grants the eyewear incredible strength and distinctive elegance.

The timeless Smoke Black lenses feature laser-engraved details that echo our storied past: proudly bearing the original 1985 Rudy Project logo and the personal signature of founder Rudy Barbazza himself. Each pair of Performance 40 glasses comes presented in a specially crafted collector's case, proudly featuring the original colors from the company's founding era.

More than just eyewear, Performance 40 is an extraordinary piece of Rudy Project history—crafted for collectors, enthusiasts, and visionaries alike.

OTHERS

Performance Tailored for Champions

At Rudy Project, we understand every discipline demands precision, innovation, and performance. That's why each pair of our sunglasses and helmets is meticulously designed to meet the specific challenges athletes face, whether navigating intense road cycling sprints, mastering technical mountain bike trails, excelling in triathlons, or conquering extreme outdoor adventures. Our commitment begins with athletes in mind, employing cutting-edge scientific research to optimize aerodynamics, enhance comfort, and ensure exceptional safety. From gravel racing to winter sports, from rugged trail running to cross-country skiing, Rudy Project's gear delivers performance without compromise, crafted to elevate your capabilities, confidence, and enjoyment in your chosen discipline. Yet versatility is part of our DNA. Our active sports eyewear is designed not only to excel in its dedicated sport but also adapt effortlessly to everyday active lifestyles. Interchangeable lenses enable athletes to customize their glasses to changing conditions and diverse activities, reinforcing our dedication to sustainability by reducing the need for multiple purchases

sydus

Sidus is the ultimate eyewear for running and trail running. Lightweight and durable, with adjustable nose-piece and high-performance lenses including ImpactX Photochromic, Sidus ensures clarity and comfort on every run.

Exception X

Introducing Exception X, the evolution of Rudy Project's legendary eyewear. Exception X blends modern style and unmatched versatility, featuring a sleek, updated lens design while preserving iconic features. Lightweight, durable Kynetium temples ensure comfort and resilience, and the innovative flip-up lens system allows easy lens removal without tools. Compatible with prescription lenses, even high diopters, Exception X is ideal for athletes, adventurers, and those demanding clear vision and adaptable style.

astral sphere

Astral Sphere evolves the success of the Astral model with an even more advanced design. The new spherical lens supports both ImpactX photochromic and Polar 3FX technologies, while the frame—made of Rilsan Clear — offers exceptional lightness and strength. Compatible with an optical insert for prescription lenses, Astral Sphere delivers performance, protection, and style.

terraform / terraform pro

Introducing Terraform and Terraform Pro, Rudy Project's new MTB Enduro helmet designed for adventurous riders who seek superior protection, versatility, and sustainability. With its enhanced temporal and temple coverage, Terraform ensures exceptional safety on challenging terrain. The innovative visor design provides ample space to conveniently store your goggles during climbs, ensuring comfort and practicality. Built to meet rigorous NTA standards for electric bikes, Terraform guarantees optimal protection at higher speeds. Embracing Rudy Project's Ride To Zero ethos, Terraform sets a new benchmark in sustainability with 77% recycled materials used in its construction.

terraform

terraform Pro

spinshield pro

Introducing Spinshield Pro—the technical evolution of our acclaimed Spinshield. Featuring a redesigned lens for enhanced lower coverage and superior ventilation holes for optimal airflow, it keeps your vision clear under pressure. Crafted with durable, lightweight Rilsan Clear®, Spinshield Pro is your ultimate partner in performance.

thunder

Thunder embodies the pure essence of performance eyewear: where less truly becomes more. Stripped back to essential design, this model achieves ultimate functionality through perfect simplicity. Light, sleek, and effortlessly stylish, Thunder provides everything you need—clarity, comfort, and durability—and nothing you don't.

no code

Introducing No Code, Rudy Project's versatile active lifestyle eyewear. Transition instantly from daily optical use to sporty performance with the snap-on sun clip. Style, comfort, and adaptability in every frame.

what's new

sinergy

Sinergy is more than a helmet—it's responsible innovation. Featuring Monomat Technology, Sinergy is thoughtfully eco-designed for easy disassembly, using single-material components. Unlike traditional helmets that combine multiple fused materials, Monomat simplifies recycling, improving resource recovery and reducing waste.

override

Elevate your ride with the Over Ride Enduro goggle, built for bikers and motorcyclists demanding clarity, comfort, and protection. Its wide polycarbonate lens offers outstanding vision and debris resistance, with a quick-change system for effortless lens swaps.

A soft TPU frame and tough ABS/Nylon outer shell ensure lasting comfort and durability. Superior 360-degree ventilation prevents fogging, while a silicone-gripped, adjustable 45mm strap and sweat-absorbing triple-layer foam keep you comfortable and secure.

Certified EN1938:2010, anti-fog treated, and tear-off compatible—ride confidently with Over Ride.

Beyond Sustainability

At Rudy Project, sustainability isn't a destination—it's the journey we ride every day. Our holistic ESG strategy, Ride To Zero, guides us in measuring and dramatically reducing emissions throughout our product lifecycle, while embracing circular economy principles to minimize our environmental footprint. But sustainability for us means even more: it's about enhancing the wellbeing of our communities, empowering stakeholders, and riding together towards a future we're proud to share.

Measuring Our Impact with Precision

To accurately track and reduce our carbon footprint of our products, we use the Carbon Footprint Systematic Approach. This advanced tool meticulously calculates greenhouse gas emissions across every stage of a product's life—from sourcing materials and manufacturing to distribution, use, and final disposal. All our calculations undergo independent certification by trusted third-party organizations, ensuring transparency and credibility. Our reference is the UNI EN ISO 14067:2018, included the attachment C about the Systematic Approach for a CFP.

Below, we illustrate how sunglasses generate emissions from cradle to grave. The chart shows average emissions based on a representative model of Rudy Project eyewear, presented here for illustrative purposes.

Carbon Footprint | CFP Systematic Approach

ridetozerø

R&D for reduced Environmental Footprints

Drawing from Rudy Project's years of experience in research and development for product improvement, we are now focusing on using that knowledge to lower the emissions of our products, making a strong effort towards better environmental sustainability.

RILSAN CLEAR is available only on Turbolence, Magnus, Nyad, Astral Sphere,Astral X, Astral, Sirius, Detabeat, LightFlow A/B , Stellar, Overlap.

- RESPONSIBLE FRAME MATERIALS** Gradually replacing conventional plastics with Rilsan® Clear, a sustainable bioplastic derived from renewable castor oil.
- MAXIMUM DURABILITY** Proudly made in Italy, Rudy Project eyewear utilizes top-quality materials, state-of-the-art manufacturing, and stringent quality control to ensure the longest possible product lifespan.
- TIMELESS DESIGN** Rudy Project's "timeless design" encapsulates an enduring appeal, as their eyewear We reject fast fashion trends, designing eyewear with a timeless aesthetic that resists fleeting trends, reducing the need for frequent replacements.
- VERSATILITY** Engineered specifically for peak performance in individual sports, yet adaptable to diverse disciplines and changing weather conditions, making Rudy Project glasses your perfect all-around companions.
- LOW-IMPACT PACKAGING SOLUTIONS** Mindful that packaging impacts our products' emissions, we strive to use recyclable and recycled materials wherever possible—ensuring safe transport and reducing returns caused by product damage.
- LONG TERM PRODUCT ASSISTANCE** We are committed to supporting our consumers with accessible spare parts and dedicated assistance, extending even further the long lifespan of every Rudy Project product.

**ALIGNED FOR IMPACT:
SUPPORTING THE UN'S 2030
AGENDA**

THE UNITED NATIONS' 2030 AGENDA FOR SUSTAINABLE DEVELOPMENT IS A GLOBAL CALL TO ACTION, OUTLINING 17 SUSTAINABLE DEVELOPMENT GOALS (SDGS) TO BUILD A BETTER, FAIRER, AND HEALTHIER WORLD BY 2030. AT RUDY PROJECT, WE'VE IDENTIFIED KEY SDGS THAT CLOSELY ALIGN WITH OUR CORE VALUES AND ESG COMMITMENTS. HERE'S HOW WE'RE ACTIVELY CONTRIBUTING TO ACHIEVING THESE CRITICAL GOALS.

Rudy Project promotes good health and well-being by offering high-quality sports eyewear and helmets, designed to support outdoor activities and encourage active lifestyles. By enhancing the safety and performance of athletes, we aim to foster better mental and physical health. We are dedicated to promoting sports among young people and supporting inclusive sports activities.

We support quality education through initiatives such as sponsoring the National Inter-scholastic Cycling Association (NICA), developing mountain biking programs, and organizing Bike Academies. Our involvement in the Ride to Zero program emphasizes cycling safety and sustainability, empowering the next generation of cyclists with the knowledge and skills to ride safely and responsibly.

We invest in sustainable product innovation, prioritize hiring local talent to reduce travel emissions, and actively promote alternative transportation methods. Rudy Project is dedicated to continuous improvement and sustainable development, ensuring our products and practices contribute positively to the environment and society.

As members of local sustainability groups, we actively promote best practices related to sustainability among companies in our region. Through these collaborations, we foster a culture of shared learning and growth on sustainability issues. Additionally, we organize Bike Academies to enhance urban mobility and encourage sustainable transportation within our community. This collective approach helps build more sustainable and resilient cities.

Some of our durable sunglasses are made from high-quality, bio-based materials. We focus on making our products easy to recycle and use recyclable packaging to reduce waste. Additionally, we continuously research new materials, construction methods, and end-of-life disposal techniques to reduce our emissions. Rudy Project is committed to minimizing our environmental impact through responsible consumption and production practices.

We support gender equality through initiatives such as the Ride to Equality program, which aims to promote cycling among women in disadvantaged regions of the world, where they might not otherwise have access to professional sports. Within our organization, we ensure equal pay and maintain a balanced gender ratio, promoting fairness and empowerment in sports.

We promote clean energy by installing solar panels on our office rooftops, significantly reducing our environmental footprint and contributing to a greener future. This initiative reflects our commitment to sustainable practices and renewable energy sources.

We foster a transparent workplace by offering comprehensive training programs and supporting local economies through our manufacturing operations in Italy. We promote work-life balance with flexible hours, ensuring our employees can thrive both professionally and personally. Rudy Project is committed to sustainable economic growth and creating a positive impact on our community and beyond.

We support climate action through various initiatives aimed at reducing our environmental impact. Our efforts include promoting sustainable practices, reducing carbon emissions, and raising awareness about climate change. These actions underscore our commitment to mitigating climate change and promoting environmental sustainability.

We support reforestation and the restoration of natural habitats through various initiatives. For example, our participation in "One Tree, One Product" reflects our commitment to preserving outdoor environments. Rudy Project is dedicated to ensuring that future generations can enjoy and benefit from healthy, sustainable ecosystems.

Partnerships are crucial for us. We collaborate with organizations such as Confindustria Veneto Est and work with ambassadors like Sonny Colbrelli to drive positive change and achieve sustainable development goals. Through these collaborations, we strengthen our efforts towards sustainability and community development.

Advanced Lens Technology for Superior Performance

IMPACTX
PHOTOCHROMIC

p.22 for futher informations

ImpactX lenses represent the pinnacle of Rudy Project technology. Crafted from a cutting-edge thermoplastic polymer, these lenses are semi-rigid, combining outstanding flexibility with unparalleled strength for maximum protection during impacts. Featuring advanced photochromic technology, ImpactX lenses automatically adjust to changing light conditions, ensuring crystal-clear vision throughout the day. With an Abbe number significantly superior to standard polycarbonate, they deliver extraordinary optical clarity, reducing distortion to provide vivid, high-definition visuals. Ultra-lightweight and robust, ImpactX lenses are engineered for athletes demanding the best.

POLAR3FX
POLARIZED

p.26 for futher informations

Polar3FX lenses eliminate glare and reflections, revealing a clearer, sharper visual field for an improved outdoor experience. In classic GREY, these lenses integrate an internal anti-reflective coating, significantly enhancing comfort and visual clarity. For a heightened visual experience, Polar3FX lenses in BLUE, RED, and GREEN mirror finishes incorporate HDR technology, optimizing contrast in low-light conditions to provide a richer, more vibrant vision. Their advanced oleophobic coating repels water, oils, and dirt, making them effortlessly easy to clean and ensuring they remain pristine even under challenging conditions.

RPOPTICS
MULTILASER

p.28 for futher informations

RP Optics lenses harness the proven reliability of premium polycarbonate to deliver superb optical performance. Offering complete UV400 protection, they safeguard your eyes from harmful ultraviolet rays, letting you focus entirely on your performance. Available in a wide array of vibrant colors and mirror finishes, they perfectly blend functionality with contemporary style, satisfying athletes who crave exceptional performance without compromising their look.

IN THE RELENTLESS PURSUIT OF EXCELLENCE, RUDY PROJECT PUSHES BEYOND CONVENTIONAL OPTICS. IMPACTX® LENSES ARE NOT JUST LENSES—THEY ARE THE CULMINATION OF CUTTING-EDGE SCIENCE, ATHLETE-DRIVEN INNOVATION, AND AN UNWAVERING COMMITMENT TO ULTIMATE PERFORMANCE.

CRAFTED FROM A REVOLUTIONARY PHOTOCHROMIC SEMI-RIGID POLYMER, IMPACTX® LENSES ARE ENGINEERED TO ADAPT TO YOUR ENVIRONMENT AND YOUR EFFORT. THESE LENSES FEATURE **LIGHT-RESPONSIVE TECHNOLOGY**, ADJUSTING INSTANTLY TO CHANGING LIGHT CONDITIONS—WHETHER YOU'RE SPRINTING THROUGH SUN-DRENCHED ROADS OR DESCENDING INTO A SHADOWED FOREST TRAIL. YOU'LL EXPERIENCE **SEAMLESS VISUAL CLARITY** FROM DAWN TO DUSK, WITHOUT EVER NEEDING TO SWITCH LENSES.

WHAT SETS IMPACTX® APART? **UNMATCHED IMPACT RESISTANCE**. ORIGINALLY DEVELOPED FOR MILITARY AND AEROSPACE APPLICATIONS, THIS MATERIAL IS VIRTUALLY INDESTRUCTIBLE, PROTECTING YOUR EYES FROM DEBRIS, CRASHES, AND HARSH ELEMENTS. UNLIKE TRADITIONAL POLYCARBONATE, IMPACTX® DOESN'T SHATTER UNDER STRESS—IT FLEXES. THAT'S NOT JUST SAFETY. THAT'S CONFIDENCE.

ImpactX technology

IMPACTX

PHOTOCHROMIC

SEMI-RIGID | TECHNOLOGY

Crafted from advanced photochromic polymer, ImpactX® lenses offer superior eye protection through a semi-rigid structure specifically designed to absorb impacts and shocks effectively. Their unique ability to flex slightly under stress significantly reduces the risk of injury, making them ideal for high-intensity sports and challenging outdoor adventures. Additionally, all ImpactX® lenses feature a premium anti-scratch coating, ensuring durability and maintaining optical clarity even under the toughest conditions.

PHOTOCHROMIC | ADAPTABILITY

ImpactX® lenses feature superior photochromic technology, adjusting rapidly to changing light conditions. Whether you're cycling through varying landscapes, golfing under shifting skies, or running from dawn to dusk, these lenses automatically adapt, maintaining optimal visibility and comfort throughout your activity.

EXCEPTIONAL OPTICAL | CLARITY

Engineered for unmatched visual acuity, ImpactX® lenses ensure sharp, distortion-free vision. Thanks to their lower refractive index and precise optical correction, they provide clarity and depth perception critical to high-performance scenarios.

LIGHTWEIGHT and DURABLE

Light yet extraordinarily robust, ImpactX® lenses offer enduring performance without compromising comfort. Resistant to scratches and chemicals, their longevity ensures they withstand rigorous daily use and harsh environments.

HDR | HIGH DYNAMIC RANGE

This technology is designed to enhance visual performance by selectively filtering specific wavelengths of light. This process amplifies essential colors and reduces visual noise, resulting in improved contrast, sharper details, and more vivid color perception. Integrated into lenses like the ImpactX® 2 Red and ImpactX® 2 Laser Purple, HDR technology provides athletes with clearer vision and heightened depth perception, crucial for high-performance activities in varying light conditions.

Polar3FX technology

POLAR3FX

ADVANCED POLARIZATION TECHNOLOGY

Polar 3FX lenses feature cutting-edge polarized filters designed to dramatically reduce glare and reflections caused by sunlight bouncing off water, roads, and other reflective surfaces. By selectively blocking horizontal light waves, these lenses significantly enhance visual clarity and contrast, enabling users to see with unprecedented precision.

SUPERIOR VISUAL PERFORMANCE

Experience unmatched visual acuity with Polar 3FX lenses. Engineered to heighten contrast and enhance definition, these lenses deliver vibrant colors and crisp details even under challenging light conditions. Athletes benefit from:

- Exceptional glare reduction
- Sharper, more detailed vision
- Increased visual comfort and reduced eye fatigue
- Reliable performance in bright and reflective environments

POLAR 3FX
FLASH GREY

POLAR3FX HDR

HDR Technology

Rudy Project's Multilaser lenses (Blue, Red, Green) incorporate advanced HDR (High Dynamic Range) technology. HDR selectively filters specific wavelengths of light to amplify color contrasts and enhance visual perception, particularly in challenging lighting situations such as shaded areas. Users benefit from improved contrast perception, heightened visual detail, and greater visual acuity under diverse lighting conditions.

OLEOPHOBIC TREATMENT

The oleophobic treatment is a special coating applied to lenses that repels oils, fingerprints, and smudges. It keeps the lens surface cleaner for longer, enhances visual clarity, and makes cleaning quick and easy. This treatment also helps protect lenses from everyday wear, improving durability and performance—ideal for athletes and active lifestyles.

Rp optics technology

RPOPTICS MULTILASER

For particular light conditions, Rudy Project offers technically advanced specialty lenses with high visual quality tailored to your needs. The various lenses enable you to perform and excel in any light or atmospheric condition you may encounter.

RP Optics is a design philosophy that aims to improve visual performance and eye protection by means of selective lenses with high optical and mechanical performance, combined with the most advanced technologies and scientific applications.

Our lens program has features common to every type of lens, such as neutralizing ultraviolet radiation completely up to 400 nm (UV 400 Protection), and maintains colors integrity even with the dark filters. We believe it is not enough to protect the eyes from hazardous radiation and external agents. It also important to enhance visual acuity and minimize distortion, while offering high quality optics suitable for sports. In some extreme conditions an athlete must rely on technologies to enhance performance and minimize distractions. For this reason, we have expanded the range of filters with specific treatments including antifog, hydrophobic, and photochromic technology.

ALWAYS AT THE FOREFRONT OF TECHNOLOGY, OUR LENSES GUARANTEE VISUAL ACUITY AND PHYSICAL PROTECTION OF THE EYE. HIGH VISUAL QUALITY LENSES HAVE THE FOLLOWING PROPERTIES/BENEFITS:

- reduce glare / enhance contrast

- protect from ultraviolet rays

- protect against external agents.

- ensure true vision without distortion of colors

technology features

RUDY PROJECT SUNGLASSES ARE LOADED WITH FEATURES THAT MAXIMIZE YOUR COMFORT AND PERFORMANCE. HERE IS A LIST OF TECHNICAL SOLUTIONS THAT MAKE OUR SUNGLASSES THE BEST-IN-THE-WORLD. ON EVERY PRODUCT PAGE OF THE CATALOGUE YOU WILL FIND ICONS THAT REPRESENT THESE FEATURES.

ADAPTIVE TIPS

The Adaptive Tips system is designed to ensure maximum comfort : thanks to its interior bendable stainless steel, the front portion of the tip can be very easily adjusted and the rear portion of the tip naturally flexes without hurting the riders' head when inserted through the helmet vents

ADJUSTABLE NOSEPIECE

Our soft adjustable nose pads offer an exceptional custom fit for any shape of face

ADJUSTABLE TEMPLE

Adjustable temples ensures a fully custom and a perfect grip maximizing the stability of the sunglasses.

COMPRESSION FIT

The wraparound geometry of the Rudy Project performance eyewear delivers a natural compression fit without applying too much pressure on the head increasing comfort and stability

INTERCHANGEABLE BUMPER

The bumpers are colorful rubber inserts placed on the lower edge of the lens and designed to maximize your safety in the event of crash

COUNTER MASK

The vented and padded full-face counter mask provides additional protection from wind and atmospheric elements increasing the safety of the eyes area.

QUICK CHANGE

The Quick Change feature allows you to easily and swiftly change out lenses to manage any light condition and choose the look that suits you best

ELASTIC STRAP

The elastic strap with included head lock is essential to secure your eyewear and retain it while wearing a helmet

TOTAL COMFORT FIT

Featuring ergonomic design, complete adjustability, multiple sizes and smart comfort solutions, our eyewear ensure unparalleled comfort and fit with the physical features of each ethnic group.

VENT CONTROLLER

Rudy Project vent controller is designed to adjust the airflow through the lens to reduce thermal shock, prevent misting, and ensure perfect vision and comfortable ventilation.

PERIPHERAL SHIELDS

The peripheral shields are removable rubber inserts which enhance protection from side light and shocks caused by eventual falls or impacts with rocks or branches.

POWERFLOW

The Power Flow ventilation system reduces the risk of fogging thanks to venting scientifically located on the frame, lens, and temple tips.

RX-ABLE

Most of our models offer prescription solutions to always ensure the best standard of performance for all prescription wearers.

SAFETY PROJECT

Rudy Project eyewear provide superior safety through integrated hinges and soft, thermoplastic elastomers which prevent injuries in the event of falls, impact and collisions.

RILSAN

RILSAN® material is used for injecting frame, made from the oil of the castor bean grown in the Gujarat region of India. The oil is further refined during several steps to produce the primary bio-based raw material in the polymer.

rx optical solutions

RX DIRECT

THE ULTIMATE OPTION

- the world's most advanced digital surface lenses
- fully personalised
- Maximum impact resistance
- Stylish wraparound design
- Superior eye comfort (absence of distortions)
- photochromic or polarized lenses

RX INSERTS

THE VALUE OPTION

- Easy to mount and interchangeable
- Perfect for lower budgets
- Allows opticians to edge prescription lenses in the office
- Available on all performance models
- Perfect for contact lens wearers

RX OPTICAL DOCK

THE HIGH CORRECTION SPORT OPTION

- Easy to mount and interchangeable
- Perfect for sport high prescriptions
- Available in our top selling performance models
- allows opticians to edge prescription lenses in the office
- full rim interchangeable design
- built to last

RX OPHTHALMIC PERFORMANCE

THE ALL-DAY OPTION

- Designed for everyday wear with a sporty aesthetic.
- Combines casual style with technical sport features.
- Optimized for clear vision during various sports activities.
- Offers comfort and durability for daily prolonged use.
- Easily adaptable for prescription lenses, providing seamless vision correction.

RX READERS

THE INTEGRATED READING OPTION

- Perfect for people with presbyopic correction needs
- Helps to read - maps, smart/mobile devices, hear rate monitors, score cards, etc..
- PC bifocal lenses available in 3 powers and 3 vibrant multilayer colours

RX FLIP-UP

THE VERSATILE OPTION

- Perfect for high prescriptions and versatile sun protection
- Allows instant control over light transmission
- Designed for sport but ideal for any occasion
- Driving friendly
- Allows opticians to edge prescription lenses in the office

RX OPHTHALMIC

THE PRESCRIPTION OPTION

- Inspired from our performance models features but with the casual touch
- Allows opticians to edge prescription lenses in the office

TECHNICAL FEATURES Density gr/cm³ 1,11 - Refractive index 1,53 - Abbe Number 45 - UV Cutout 400 - Absorption 100% UVA UVB

Offering freeform single vision and progressive lens design for performance sport wraps, ImpactRX[®] is the world's most advanced digital back surface lens program, fully personalized for your lifestyle. We've combined a revolutionary lens material with the best wrap design to create the best prescription sports lens in the world! Now available in many superlative platforms. For more information please contact your country official Rudy Project distributor (<http://www.rudyproject.com/customer-service/distributors/>) or send an email to rudyrx@rudyproject.com to receive your personal web credentials. Once activated you can immediately place orders.

WARNING The content of this catalog section is dedicated exclusively to opticians and qualified healthcare operators. Therefore, in compliance with the Italian legislation, I declare under my own responsibility that I am a qualified professional in the optical and/or ophthalmology sector and I am allowed to have access to this content.

Seamless prescription.
Unstoppable performance.

MONOBLOCK TECHNOLOGY:

- Rudy Project lenses featuring Maximus technology are crafted from a single optical block, eliminating any visible inserts externally.
- The absence of external discontinuity provides flawless aesthetics, exceptional strength, and unparalleled optical consistency.

INNOVATIVE DESIGN, INVISIBLE POWER:

- The internal optical insert maintains the sporty look of the lens, seamlessly blending style and performance.
- Invisible technology offering visual security you can feel but not see.

**PERFECT VISION,
PEAK PERFORMANCE:**

- Engineered specifically for athletes requiring prescription lenses during sports, delivering absolute clarity and uncompromising visual comfort.
- Maximum optical sharpness without distortion, enabling complete focus on your performance.

**UNCOMPROMISING
VISUAL COMFORT:**

- Exceptional optical uniformity significantly reduces eye fatigue, enhancing athletic performance even during long and demanding sessions.

ASTRAL SPHERE

WHAT IS POLAR 3FX?

POLARIZED LENSES effectively block reflected glare, a situation which occurs primarily near water or snow or off reflective surfaces nearby, such as car windows, metallic objects, etc. Light which strikes a horizontal reflective surface is reflected back into your eyes. You then get a “double dose” of light energy, some of which falls directly on to you and some that is reflected on to you. Polarized lenses offer an interesting advantage: because they dramatically reduce or eliminate the reflected light energy which might account for the majority of the annoying glare, you can use a lighter tint to achieve the same (or better) degree of glare reduction and comfort compared to non-polarized dark lenses.

PATENTED 3FX POLARIZED TECHNOLOGY

POLAR3FX coatings offer:

- Advanced visual acuity, depth of field perception, chromatic partitioning.
- Minimizes annoying staining and smudging for clean, unobstructed vision all the time.
- Highly scratch resistant.
- A unique and sophisticated fashionable look.

ANTI-REFLECTION COAT INCLUDED - DIAMOND COAT INCLUDED

Rudy Project’s unique multi-layer process provides excellent visual acuity an eliminates annoying back glare that causes eye strain and eye fatigue in bright light conditions. Reduced hue and ambient reflections.

TECHNICAL FEATURES Density gr/cm3 1,20- Refractive index 1,59 - Abbe Number 31 - UV Cutout 385 - Absorption 100% UVA UVB

After years of intense research, we have updated our Polar3FX technology to take your vision to the next level. Polar3FX HDR technology eliminates glare providing superior visual comfort, enhanced contrast and contours. In addition, the new Polar3FX lenses incorporate the HDR (high dynamic range) filter to further define contrast and color perception. To ensure maximum toughness and durability, we have boosted the Polar 3FX lenses with the revolutionary 3FX Coating anti smudge and anti aging treatment.

OUR 1.6 ENTRY MATERIAL OF CHOICE FOR PATIENTS WITH HIGH PRESCRIPTIONS, OR WHEN LENS THICKNESS CONSIDERATION IS ESSENTIAL

Rudy Project created a new and innovative Hybrid material, dedicated to patients with stronger prescriptions: the ImpactRx High Index combines the best attributes of High Index, such as its extraordinary thinness, to the comfort of ImpactRX, offering strength and durability.

Main features include:

- LOWER DENSITY TO PROVIDE LIGHTER LENSES AND INCREASED COMFORT
- ENHANCED IMPACT RESISTANCE (UP TO 5 TIMES WHEN COMPARED TO OUR PREVIOUS HI-1.6 MATERIAL)
- IMPROVED COSMETIC FOR WRAP LENSES
- THINNER THAN COMMON HIGH INDEX 1.60 MATERIALS (UP TO 5%)

DIAMOND COAT INCLUDED

TECHNICAL FEATURES Density gr/cm3 1,23- Refractive index 1,60 - Abbe Number 41 - UV Cutout 400 - Absorption 100% UVA UVB

What’s oleophobic treatment?

The oleophobic treatment is a special coating applied to lenses that repels oils, fingerprints, and smudges. It keeps the lens surface cleaner for longer, enhances visual clarity, and makes cleaning quick and easy. This treatment also helps protect lenses from everyday wear, improving durability and performance—ideal for athletes and active lifestyles.

What’s anti-reflection coating?

Lenses with higher indices also reflect more than standard plastic and glass. Because of this, anti-reflective coating is especially important. Additional reflections will be distracting in day to day activities such as night driving and computer use. Impurities, water drops, dust, scratches will heavily influence the comfort of high index lenses, for these reasons, Rudy Project offers diamond coat, our new premium coating.

ATTENTION

For its highly engineered vision solution using extremely sophisticated edging equipments, all models of the ImpactRX and ImpactRX High Index collection are mounted and shipped directly and exclusively through our own laboratories according to selected sunwear geometry and original patient’s prescription formula.

What’s diamond coat?

WHAT IS DIAMOND COAT? Diamond Coat is an exceptional and powerful multi-layer coating engineered to eliminate lens glare, ghost images and halos from bright light or back reflections while offering a cleaner vision by preventing dust, water drops, scratches and finger marks on the lens. Perfect for outdoor action and dusty environments, Diamond Coat will keep lenses sparkling and easy to clean. It will ensure a better comfort while providing outstanding lens durability.

The Rudy Project Diamond Coat is a superior treatment resulting from extensive research and provides the following features:

PROGRESSIVE 15 mm.

PROGRESSIVE 18 mm.

rx optical inserts

Rudy Project has developed RX inserts that can be easily attached behind the polycarbonate lenses. Our 'easy-in easy-out' system allows for effortless insertion and removal of Clip-ons, making them convenient when you want to wear contact lenses or clean your glasses.

1. If the template is unavailable, use the demo (or plano lens) as a reference for cutting the ophthalmic lenses.
2. Properly shape the clip according to the glasses model before installation. After setting it, determine the fit parameters (PD and H) and make final adjustments when mounting progressive lenses.
3. Be sure to note your references for the true horizontal axis before removing the clip to fit ophthalmic lenses.
4. Keep in mind that the vertex distance is reduced when using an Optical RX insert, and this should be considered before mounting ophthalmic lenses.
5. The winding angle of the RX Optical Insert may vary based on the eyewear's design and geometry. It is usually much higher than that of regular dress eyewear, leading to horizontal prismatic deviation, which increases with lens power. Rudy Project generally recommends applying a horizontal shift of +1.00 mm per eye for negative correction and -1.00 mm per eye for positive correction.
6. For spherical lens values greater than +/- 3.00 diopters and considering the high wrap of Rudy Project frames, make necessary adjustments to accommodate the required horizontal prismatic compensation and reduced vertex distance.
7. Always verify the lens centering on the clip when it's inside the frame before mounting ophthalmic lenses. Avoid mounting prescriptions on clips without a frame.
8. To achieve the best results when mounting lenses on the clip, Rudy Project recommends referring to the patient's regular dress eyewear. This will ensure a quicker and easier adaptation to the new device.
9. Rudy Project advises using ophthalmic lenses with spherical geometry. For optimal performance, consider mounting lenses specifically designed for wraparound frames.

The FR70 RX Optical Insert comes now standard with 3 pairs of proprietary shock absorber stickers; made out of a special polymer they will minimize scratches and vibrations resulting from the insert/correction lenses against the inner surface of the sun/plano lenses. To be mounted on the far edge of each prescription lens of the insert.

rx optical dock

THE ENHANCED HIGH-CORRECTION SPORTS OPTION

Following years of meticulous research, we've revamped our Optical Dock, one of Rudy Project's most versatile and sought-after sports eyewear solutions, to offer prescription wearers an even more seamless and sophisticated option. The full-rim optical interface boasts a sleek design and broader shape, skillfully blending style with the remarkable adaptability and user-friendliness of the Optical Dock platform. Furthermore, it extends the prescription range for higher correction levels.

The Optical Dock 2 is an effortlessly RX-adaptable 6-Base full-rim clip crafted from a sturdy yet flexible polymer, compatible with any lens material, including entry-level edging processes. Its innovative shape provides an expanded field of view and accommodates a wider variety of prescriptions (both standard and progressive), enabling the correction of vision for higher and more intricate levels in a sleek and integrated package.

Featuring interchangeable clips, the Optical Dock 2 is simple to install, courtesy of a proprietary screwless system, and is fully compatible with our award-winning 'Rydon' model. This cutting-edge solution is ideal for patients requiring significant vision correction who also desire the design, technology, and comfort of Rudy Project sunglasses. It provides opticians with increased flexibility in handling, while offering cost-effective solutions to customers.

Introducing the groundbreaking “Readers” eyewear line from Rudy Project, specifically designed for athletes who see well from a distance but struggle up close when reading bike computers, watches, or newspapers. The all-new RX Readers sunglasses are crafted for sports enthusiasts who require minor vision adjustments without sacrificing style or functionality.

These sport reader prescription lenses are seamlessly integrated into the lower part of the RP Optics sun lens, making it easy for you to read maps or view screens on devices like mobile phones, GPS systems, cycle-computers, and heart rate monitors. The RX Readers offer three configurations of prescription lenses: Smoke, Multilaser Ice, and Multilaser Red. Each of these lenses enhances glare protection while also elevating your aesthetic appearance.

Choose from three different correction powers for each lens color: +1.5, +2.0, and +2.5. With the Rudy Project “Readers” sunglasses, you can confidently and comfortably tackle your favorite sports activities, knowing that you have the perfect combination of style, functionality, and vision support.

flip-up

INTRODUCING RUDY PROJECT'S INNOVATIVE "FLIP-UP" EYEWEAR LINE, SPECIFICALLY DESIGNED FOR ATHLETES AND SPORTS ENTHUSIASTS WHO REQUIRE PRESCRIPTION GLASSES. OUR FLIP-UP GLASSES COMBINE THE VERSATILITY OF PERFORMANCE EYEWEAR WITH THE CONVENIENCE OF A UNIQUE FLIP-UP LENS SYSTEM, ALLOWING YOU TO ADAPT SEAMLESSLY TO SUDDEN CHANGES IN LIGHT CONDITIONS.

Equipped with Quick Change Interchangeable Lens Technology, our Flip-up glasses empower players and athletes to effortlessly manage varying light conditions on the field, on the bike, or on the green. This advanced lens system is perfect for sports where quick visual adjustments are crucial, such as baseball, biathlon, golf, shooting, and archery.

Our revolutionary flip-up mechanism allows you to swiftly lift the additional lenses in case of a sudden decrease in light or remove them entirely to maintain only the prescription glasses. This adaptability helps eliminate fogging and ensures optimal visual clarity for a winning performance.

The Rx insert is designed to accommodate a wide variety of prescriptions, offering eyeglass wearers a sleek and stylish alternative to bulky prescription sports eyewear. Experience the perfect fusion of function and fashion with Rudy Project's Flip-up eyewear line, and elevate your game to new heights.

UNLEASH YOUR SPORTY SPIRIT IN EVERYDAY EYEWEAR

INTRODUCING THE OPHTHALMIC LINE, A UNIQUE COLLECTION OF EYEGLASSES DESIGNED FOR THOSE WHO CRAVE A SPORTY LOOK IN THEIR EVERYDAY PRESCRIPTION EYEWEAR. BLENDING ADVANCED SPORTS TECHNOLOGY WITH A LIFESTYLE-ORIENTED DESIGN, OPHTHALMIC GLASSES ARE PERFECT FOR INDIVIDUALS SEEKING TO EXPRESS THEIR ATHLETIC SIDE WHILE ADDRESSING THEIR VISION NEEDS.

Key Features:

- Sport-Inspired Design: Drawing from our expertise in high-performance sports eyewear, the Ophthalmic line offers a dynamic, athletic appearance that suits the needs of those requiring prescription lenses for daily use.
- 360-Degree Adjustable Temples: Experience maximum comfort and stability with our innovative adjustable temple design. Ophthalmic glasses allow for a full 360-degree temple adjustment, ensuring a customized, secure fit for any head shape.
- Rubber Nose Pads: To enhance grip and provide a comfortable, secure fit throughout the day, Ophthalmic glasses feature slip-resistant rubber nose pads. These pads prevent the glasses from sliding down the nose, even during intense activities.
- Versatile Lifestyle Appeal: While Ophthalmic glasses boast sports-inspired features, they maintain a lifestyle-oriented look that seamlessly transitions from work to play. These stylish frames are perfect for any daily activity, allowing you to embrace your sporty side without compromising on style.

Discover the Ophthalmic line by Rudy Project and experience the perfect fusion of sports functionality and everyday fashion. With Ophthalmic eyewear, you no longer have to choose between performance and style. Embrace your sporty spirit while addressing your vision needs with these exceptional glasses.

Unleash your athletic spirit with Ophthalmic by Rudy Project—where style and performance come together.

bike helmets

ASHLEY ANDERSON | ©SCOTTFLATHOUSEPHOTO

3K CARBON | REINFORCEMENT STRUCTURE

3K Carbon” technology, designed with a multi-layer composite structure to provide superior protection and performance. The outermost layer is crafted from 3K carbon fiber, known for its exceptional strength-to-weight ratio and impact resistance. Beneath this, a layer of Kevlar adds an extra level of durability and toughness. The inner structure is reinforced with three layers of fiberglass, offering excellent rigidity and energy absorption. This combination of materials ensures that the helmet delivers unparalleled safety.

DUAL DENSITY | EPS CORE

All our helmets use state-of-the-art EPS co-molding technology for enhanced safety, quality and lightweight performance. Loaded with double density EPS core using an innovative internal structure engineered to enhance air circulation and shock absorption capacity, the EGOS is our penultimate development in helmet safety.

RSR MICRO 11 | RETENTION SYSTEM

The all-new miniaturized RSR11 retention system is a sturdy yet extremely lightweight and compact safety frame anchored in the helmet: implemented with vertical fitting options and a handy easy-adjust ratchet wheel to provide a swift and exceptional user-friendly adjustment, it will flawlessly secure the helmet around the head.

ERGO DIVIDER | STRAPS

We have developed new ergonomic strap dividers to ensure stability, flush comfort over the skin and simple fitting. No struggling with the adjustments anymore, once tuned to your head it will keep its setting for a superior riding experience.

3D AIR FRAME | ADAPTIVE BAND

Our latest generation AirFrame Band has been re-engineered for an even more advanced air flow control; its seamless 3D geometry is designed to distribute ventilation from the front ports through the inner channels helping concretely sweat management; coupled with the adaptive bands connected directly to the retention system, it ensures stability, superior safety and phenomenal 360° comfort fit.

BUGSTOP PADDING | TECHNOLOGY

The “Bugstop Padding” technology offers a vital layer of protection and comfort. This feature includes a fully perforated net lining within the helmet, designed to prevent direct contact between any insects that may enter the helmet and the rider’s head. Despite its protective capabilities, the Bugstop Padding maintains excellent breathability, ensuring proper ventilation and comfort. This innovative design combines safety with an optimal airflow for a more enjoyable riding experience..

360° COMFORT FIT | TECHNOLOGY

The 360° Comfort Fit technology in Rudy Project helmets is designed to provide an unparalleled fit and stability. This advanced feature refers to the retention system’s encompassing ring that wraps around the entire circumference of the head, ensuring perfect comfort at every point of contact with the skull. By evenly distributing pressure and securing the helmet firmly in place, the 360° Comfort Fit technology enhances overall stability, reducing helmet movement.

FASTEX CLOSURE | TECHNOLOGY

The “Fastex Closure” technology in Rudy Project helmets features a classic, quick-release buckle system designed for ease and efficiency. This press-button closure allows for fast and secure fastening and unfastening of the helmet, ensuring a snug and reliable fit every time. The Fastex Closure is engineered to provide maximum convenience, allowing athletes to adjust their helmets swiftly and with minimal effort, enhancing both comfort and safety during their activities.

FIDLOCK® | CHIN BUCKLE

The compact magnetic industry-leading FidLock® buckle is intuitive, pinch-free and one handed use even wearing your gloves on. This reliable, comfortable and secure system ensures secure protection in a snap.

EYEWEAR PORTS

Building on our experience in manufacturing performance eyewear and helmets since 1985, most of our helmets integrate sunglasses dock to securely stow and access them easily.

QUICK SNAP STRAPS | TECHONOLGY

The “Quick Snap Straps” technology offers an innovative system for easy and secure removal of helmet straps. Athletes can effortlessly detach the straps for washing or color changes, ensuring optimal hygiene and customization. Engineered for convenience, the system allows quick and safe adjustments without compromising helmet stability or performance. This user-friendly design makes maintaining and personalizing your helmet simpler than ever, providing functionality and versatility to meet every athlete’s needs.

MAGNETIC VISOR | TECHNOLOGY

The “Magnetic Visor” technology in Rudy Project helmets offers a revolutionary pre-activity solution. Strategically placed magnetic elements allow for effortless visor installation and removal. Designed for pre-activity use, the visor can be quickly attached or detached, providing athletes with flexibility and ease. The system also includes secure points for storing the visor in a rest position on the helmet when not in use, ensuring it remains safely stowed and accessible.

ADJUSTABLE VISOR | TECHNOLOGY

The “Magnetic Visor” technology in Rudy Project helmets offers a revolutionary pre-activity solution. Strategically placed magnetic elements allow for effortless visor installation and removal. Designed for pre-activity use, the visor can be quickly attached or detached, providing athletes with flexibility and ease. The system also includes secure points for storing the visor in a rest position on the helmet when not in use, ensuring it remains safely stowed and accessible.

aerodynamics vs. internal ventilation?

These two elements are most often at odds in the development of an aerodynamic helmet. A very ventilated helmet provokes turbulence which negatively affects aerodynamics, but ventilation benefits physical performance. Because overall performance is what matters most for an athlete, we have conducted extensive testing in the wind tunnel to find the right balance of aerodynamics and ventilation for the development of the Rudy Project helmet collection.

"Triathletes and cyclists often face the most important races of the season in hot and humid weather conditions. These conditions can lead to deterioration, sometimes substantial, of physical performance. Training sessions and races at temperatures above 30-32 degrees Celsius with high relative humidity increase the workload of the cardiovascular, nervous, and metabolic systems due to rising core body temperature.

In addition to weather conditions, physical exertion also contributes to the increase of internal body temperature. This rise is directly correlated with the intensity of the effort. The human body, particularly that of an athlete, is able to modulate these variations by regulating core temperatures through a series of behavioral and physiological interventions. During physical exercise, core temperature increases, especially in hot, humid conditions, and can exceed the normal 36.5-37.5 degree range to as much as 40 degrees centigrade. It should be remembered that at temperatures above 41 degrees centigrade, cellular functions begin to deteriorate. When the internal temperature rises, the body's natural thermostat (hypothalamus), located in the brain, triggers a series of defense mechanisms (primarily sweating for evaporative cooling) to dissipate heat.

"During physical activity in favorable climatic conditions, the heart provides oxygen through the blood to active muscles, organs, and tissues. When heat and humidity increase, the heart is subjected to an additional workload because it must pump more blood to the skin in order to promote the evaporation of sweat. For this reason, less blood reaches the muscles. The heart rate increases with effort, and therefore the filling time of the heart is reduced with a consequent decrease in cardiac output, leading to a worsening of performance.

"When the internal body temperature begins to increase significantly during physical exercise, even the central nervous system enacts defense mechanisms to contain the production of heat. In particular, it reduces muscle recruitment by deactivating part of the muscles involved in the effort in order to avoid health risks. The inevitable consequence is the reduction of performance capacity.

"There is an infinite number of scientific studies showing that during endurance physical activities, body heating and the significant increase in core temperature tend to increase brain response times, decrease response accuracy, and generally affect physical capabilities. It is also widely demonstrated that head cooling is able to counteract these tendencies by mitigating the negative effects of increasing internal body temperature.

"Further scientific contributions have shown that scalp temperature can be considered an important factor in perceived head and overall body comfort, even in scenarios where the internal body temperature remains high. During physical exercise in high heat and humidity, the subjective perception of increased fatigue and workload on the cardiovascular system with consequent decrease in performance is certainly related to the increase in skin temperature, as well as an increase in internal body temperature, which causes critical decreases in cognitive performance.

"A helmet with superior internal ventilation ensures greater heat dissipation, and therefore better thermoregulation and homeostasis of the body's internal temperature, to the benefit of the athlete's performance capabilities."

time trial | 45 km/h (50km/h wind speed)

- simulation setup: 75kg rider, 8.5kg bike, aero drag (baseline) cda 0.250
- * course: 70.3 ironman 90km with 500m climbing. full ironman 180km with 1000m climbing
- power output: 200W average (typical age group athlete on long distance ironman)
- helmets tested in M size

SWISSIDE NO.1 IN AERODYNAMICS WIND TUNNEL TESTING SESSION | THIS REPORT SHOWS A PRIVATE WIND TUNNEL SESSION DIRECTED BY SWISS SIDE, THE NUMBER ONE COMPANY IN AERODYNAMICS, TO COLLECT SCIENTIFIC DATA ON THE PERFORMANCE OF OUR AERO HELMETS.

FALLS CAN PROVE TO BE VERY COSTLY AND HAVE PERMANENT OR EVEN LETHAL CONSEQUENCES. THE STARTING POINT FOR THE DEVELOPMENT OF RUDY PROJECT’S HELMETS IS THE ADOPTION OF ONLY HIGHLY-ADVANCED MATERIALS WHICH CAN ABSORB SHOCKS AND DISSIPATE THE MECHANICAL ENERGY WITHOUT IT BEING TRANSFERRED TO THE HEAD AND BODY.

Our bicycle helmets, depending on the design and market of destination, comply with the provisions of Module B of the Regulation (EU) 2016/425 “Personal Protective Equipment” and with the national standard transposing the harmonized standard(s) EN 1078:2012+A1:2012 “Helmets for pedal cyclists and for users of skateboards and roller skates” for PPE of Class II, or with American safety standard “CPSC § 12.03 U.S. Consumer Product Safety Commission Safety Standard for Bicycle Helmets for Persons Age 5 and Older.” Check carefully the markers and informations placed on the labels placed on the product and on its packaging to verify the security standards are fulfilled by the helmet. A copy of the declaration of conformity could be downloaded from the website www.rudyproject.com/warranties. All the Rudy Project helmets are tested in the production sites and by the independent certification authorities.

The purpose of a bike helmet is to protect the rider’s head by absorbing the impact energy through the partial, and not always visible, destruction of the helmet itself, including the compression of the interior EPS foam liner. To be an effective protection for the head/brain, bike helmets have to meet a number of conditions that test how well they perform in an impact, including the strength of the retention system and their stability of the on the wearer’s head. To ensure a uniform standard of safety testing for bicycle helmets, many countries have adopted bike helmet certification standards with which manufacturers and importers must comply.

All the Rudy Project bicycle helmets, depending on the market of destination, comply with one of the following Standards:

CE/EN 1078

Created in 1997, the EN 1078 Standard was approved in 2012 by the European Committee for Standardization (CEN) and amended the same year into the EN 1078:2012+A1:2012 standard for all cycling, skateboarding and roller skating helmets sold in Europe.

The EN 1078 Standard covers helmet construction including field of vision, shock absorbing properties, retention system properties including chin strap and fastening devices, as well as marking and information. The standard’s key features are:

- Test anvils: Flat and kerbstone
- Drop apparatus: Guided free fall
- Ambient, Hot, Cold and wet conditioning
- Impact velocity, energy or drop height flat anvil: 5.42–5.52 m/s
- Impact energy criteria: < 250g
- Roll-off test
- Retention system strength: Force applied dynamically. Helmet supported on headform.

CPSC / CPSC 12.03

In the United States, The Consumer Product Safety Commission (CPSC) was tasked by Congress with the development of a U.S. Government standard for bicycle helmets and began to do so in 1994. After working with an ASTM task group and producing two drafts for public comment, the third and final draft was approved in February of 1998 and the final version of the standard was published. One interpretation letter has been issued since that time. The standard covers all helmets produced for the US market after March 10, 1999. The CPSC 1203 Standard covers helmet construction including field of vision, shock absorbing properties, retention system properties including chin strap and fastening devices, as well as marking and information.

The standard’s key features are:

- Test anvils: Flat, kerbstone and hemispheric
- Drop apparatus: Guided free fall
- Ambient, Hot, Cold and wet conditioning
- Impact velocity, energy or drop height flat anvil: 2 m
- Impact energy criteria: < 300g
- Roll-off test
- Retention system strength: Force applied dynamically. Helmet supported on headform.

Currently, nearly each research group active within helmet safety has its own definition of helmet safety. An official Standard that allows measuring and quantifying oblique impact and combines the insight of the different experts would provide a more objective framework of about helmets safety. On this purpose, CEN (THE EUROPEAN COMMITTEE FOR STANDARDIZATION), through the Technical Committee TC 158 which is dedicated to the head protection and the eight Working Groups currently active under it, is developing a method for measuring the absorption of energy from oblique or normal impacts

The Working Group directly focused on that is known as the CEN TC 158 / Working Group 11.

At Rudy Project we are committed to develop products aiming to the highest level of safety, exceeding the current requirements set by international Standards, such as the CE or CPSC norms. Today more than ever our goal is to go even further by overpassing also the RP ROTATIONAL IMPACT TEST.

The RP ROTATIONAL IMPACT TEST is an internal protocol adopted by Rudy Project, in cooperation with accredited and notified bodies, to test and measure the performance of the helmets against rotational impacts; it takes inspiration from CEN, from ECE 22.06 (a new standard for motorcycle helmets) and it is based on real accident data and scientific sources. The RP ROTATIONAL IMPACT TEST “pass-fail” criterion is based on the BRIC (Brain Injury Criterion) value, an algorithm that defines the level of brain injury. This value must be less than 0,68.

*The RP ROTATIONAL IMPACT TEST is a RUDY PROJECT internal protocol to test and measure the performance of the RUDY PROJECT helmets against rotational impacts. This test has not been adopted by CEN or by its Working Group CEN TC 158 / Working Group 11.

RP ROTATIONAL IMPACT TEST

- oblique tests @ 45° on X,Y and Z axis
- impact speed 6 m/s, BRIC < 0,68
- grade 80 closed-coat aluminum oxide abrasive paper
- headform nominal coefficient of friction 0,3
- wireless system: triaxial accelerometer + n. 3 ARS
- Headform: EN960 serie
- Measurements: Peak of rotational acceleration, Peak of linear acceleration, HIC, BRIC (< 0,68)

WINGDREAM, REBEL EGOS, NYTRON, SPECTRUM, VENGER, VENGER CROSS, PROTERA+ SUCCESSFULLY PASSED RP ROTATIONAL IMPACT TEST

 Backpack is suitable both for the Wingdream and The Wing. There is a special foam support inside (even removable) that allows to room both the helmets. The internal foam works to keep the helmets stable as well as for the protection of their "ears", by preventing from compression. Shoulder straps are detachable. 2 mesh pockets inside, on the upper shell. 1 external mesh pocket.

Der Rucksack eignet sich sowohl für den Helm Wingdream als auch für den Helm The Wing. Im Inneren befindet sich eine spezielle Schaumstoffhalterung (auch herausnehmbar), die Platz für beide Helme bietet. Der interne Schaumstoff sorgt für die Stabilität der Helme und schützt deren „Ohren“ vor Kompression. Die Schultergurte sind abnehmbar.
2 Netztaschen innen, im oberen Bereich der Schale.
1 externe Netztasche.

helmet sizing guide.

- 01

LOCATE MEASURING INSTRUMENT
Locate a pliable measuring ribbon or a mobile charging cable (and a straightedge to compare it against).
- 02

TAKE MEASUREMENT
Encircle the cable around your head slightly over the brow line.
- 03

DETERMINE YOUR SIZE
Consult the table above to identify your fitting.
If you're between two dimensions, opt for the smaller one.

ATTENTION
The Rudy Project helmets are engineered and manufactured with different specifications according to the markets of destination. If your helmet bears a CE designation, it meets the requirements of the Council Directive 89/686/ECC and of the European technical Standard EN 1078. If your helmet bears a CPSC designation, it meets the standard safety requirements of the U.S. Consumer Product Safety Commission. If your helmet bears a AS/NZS designation, it meets the standard safety requirements of the Australian Standard AS/NZS 2063.
